 *40% Deposit is required to Web design implementation.

2000TE WEB DESIGN PACKAGE

Service Features	Description
● 200 MB Disk Storage!	99% of the customers we host do not use 200 MB. Chances are, this is more than you'll ever need.
● 16 GB Data Transfer	If your webpage is 16K, that means you can receive 1 Million hits per month! Other Web hosting companies don't even offer half the data transfer we do. As your website grows, you won't have to worry about outgrowing your Web hosting package with 2000TE support.
● Web Address (yourname.com)	You can use your own domain name (yourname.com) for your web address.
● 100 POP3 E-mail Accounts	These are actual mail accounts stored on our servers. You can create POP accounts real-time in our control panel. Your e-mail can be retrieved with any email client or our Web Based Mail.
● \$15 Domain Name Registration	If you do not yet have a domain name, we can register any new domain name for you for only \$15 a year! Compare this to the standard price of \$70 for a 2 year registration charged by Network Solutions and others.
● CGI-BIN	You can run your own scripts on our servers. This will allow you to execute CGI scripts written in Perl or Unix Shell.
● Control Panel	Now you can make changes to your hosting account in real time! You can change passwords, add e-mail accounts, view account info and more.
● Search Engine Submission	You'll be able to submit your website to 40 major search engines with the click of a button. It's that easy!
● 100 E-mail Forwarding	We can forward all e-mail sent to your domain (anything@yourdomain.com) to any one of your existing e-mail addresses.
● FrontPage 2000/2002 Extensions	We fully support Microsoft Frontpage 2000/2002 Extensions. FrontPage extensions can be installed or uninstalled in the Control Panel.
● Unlimited FTP Access	We offer unlimited FTP access to your site. You can upload or download as many files as you like 24/7.
● DNS Manager	This is for advanced users. You have the ability to add "A records", "CNAMES" and "MX Records".
● Unlimited Email Aliases	You can use anything@yourdomain.com as your e-mail address. There are no restrictions.
● FREE SETUP	We will waive the setup fee when you purchase our annual or bi-annual package.
● Detailed Webstats Traffic Report	You can see a daily traffic report for your website. This will let you know when, where, and how your visitors came to your website.
● Mailing List	We support Mailing Lists.
● 10 unique FTP login	Create up to 10 unique FTP logins for different users. You can even create login for accessing specific folders within your home directory.
● 24/7 Technical Support	We provide 24/7 email support and phone support 5 days per week. .

- **No Forced Advertising or Links** You do not have to put other businesses' advertisements, banners, or links on your website.
- **PHP4** HTML-embedded scripting language and a server-side preprocessor that interprets the HTML-embedded code in order to create dynamically generated Web pages.
- **Web Based Mail** You can compose and retrieve your e-mail through any browser from anywhere in the world with our Web Based Mail.
- **MySQL Database Access** MySQL is a very fast, multi-threaded, multi-user, and robust SQL (Structured Query Language) database server. (**\$30 setup, no additional monthly fees**)
- **SMTP Server** In case you do not want to use your ISP's SMTP to send mail, you're welcome to use ours.
- **OC12 Backbone Connection** Web server backbones are connected to the Internet with OC12 to ensure high-level performance.
- **Access to Raw Log Files** This is the RAW output of your access, error, agent and referral logs.
- **Custom Error page** When someone accesses a page on your site that does not exist, you can create your own custom HTTP server error message. [Click here](#) for an example.
- **Secure Server (SSL)** You can use SSL to encrypt any page on your site. This will allow you to conduct secured transactions and accept encrypted credit card data over the Internet. (**\$30 setup, no additional monthly fees**)
- **Community Forum** We are one of the few Web hosting company that provides a [community forum](#) so thousands of our customers can share ideas.
- **Hit Counter** Keeps track on how many people have visited your website.
- **Full Server Backup Daily** We will back-up all your files on our servers each and everyday!
- **Macromedia Shockwave** We support websites created by Flash and Macromedia.
- **Server Side Includes (SSI)** Server Side Includes (SSI) are allowed on our system.
- **Super Fast UNIX Servers** Dual 850MHz Intel Pentium III CPUs, 1GIG of RAM
- **Perl5 Support** We support the latest version of Perl (perl5)
- **Cronjobs** You have the ability to run Cron on our servers.
- **Select own Username** Other Web hosting companies assign you a username. You have the ability to select your own in our system.
- **HTTP Streaming Audio Supported** You can have HTTP streaming audio and video without having to purchase a RA server!
- **No Hidden Fees** There are never any hidden fees. You will NEVER pay more than \$7.77/month for everything!!
- **30-Day Money Back Guarantee** If we do not meet your needs or expectations, we will fully refund all monthly hosting fees within 30 days from the initial sign-up date.

Hosting Services through POWWEB (THE SERVICE INFORMATION)

Our #1 priority is to meet our clients' business and technical needs. With customers from all over the world, we have learned that the most important criteria for web hosting are **Price, Service and Customer Satisfaction.**

Price:

● **Best Prices**-We believe that everyone should receive great services at an affordable price. We've slashed our prices in half. Why pay \$15 to \$40 per month to host your web site? Our one plan package offers the same high quality service for just only \$7.77 per month!

● **No Setup Fee**- Since our setup process is now automated, there is no setup fee on yearly and bi-yearly

packages!

● **2 Months Free**- Get 2 additional months of web hosting when you order our yearly or bi-yearly packages.

Service:

● **Control Panel**-Administering your website is easy with our Web-based control panel. Our control panel was created specifically for our package by our team of programmers.

● **Fastest Connection**-Our backbone includes high speed OC12/48 connection for efficient and reliable high-speed performance. This is fast, reliable and unbeatable.

● **Technical Support**-Your website(s) will be in good hands with 2000TE and Pow Web. We provide 24/7 Email support, 5 days phone support and a [community forum](#) with thousands of webmasters so you can share ideas, post questions and answers 24 hours and 7 days a week!

● **Upgrades**-Our development team is continuously upgrading our systems with the latest technology, creating new tools and features to make your web presence as easily maintainable and reliable as possible. All upgrades will be available to all of our customers at no additional charges.

Customer Satisfaction:

● **30-Day Money Back Guarantee**-We believe in running a fair and honest business so you are completely satisfied. If you are in anyway not completely satisfied with our service, we offer an unconditional 30-day money back guarantee.

Monthly Fee	\$7.77	\$16.95	\$24.95	\$14.95

IMPORTANT Web questions (Please return answers as soon as possible):

Characteristics/Strategies

1. What are the critical features to include in your website?
2. What are you looking for in the new design?
3. What are the defining characteristics of your users and their environment?
4. What do your current customers actually do with current site?
5. What you like to implement interactivity? (E.g. reservation by email, message board etc.,)
6. How will your website be used by this particular class of users/customers?
7. What defines easy to use for this specific group of customers?
8. How can we design your site to minimize the cost for customer support?
9. How can we reduce time spent with web design?
10. How can we help your users to find customer support and answers in your web site?
11. What should be the focus our usability efforts?

Competitive Assessment

1. How are people using your competitor's website/product?
2. What do customer like about your competitor website?
3. How has the competition addressed their web presence?

4. What are strong and weak usability aspects of your competitor's website/product?

Design Concepts:

1. What user interface paradigm should we employ for your site?
2. What constitutes a good user interface for your website?
3. What colors would you implement on your website?
4. How many links would you employ on your site design and what are they?
5. What are the benefits of these links?
6. How will your site stand out from other in your class?
7. When would you like to have your site completed?
8. Would you like our organization to maintain your site? If yes! Would it be updated once, twice or four time a month?
9. What you like to transfer hosting services?
10. Would like customized email address? If so, how many? Please list them (eg. (sale@yourdomain.com"))

Design Evaluation

1. What is wrong with your current site?
2. What did you accomplish with you last web design?

Required Information: (only if you have a current hosting service)

1. FTP address
2. Username and password
